DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

Page 1:

Applicant must update the status of the parent application by including the corresponding patent number.

Page 6:

In line 14, "228" should be --28--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble to the claim recites a "method of manufacturing a film case including a casing..., a film cover..., a lid..., and a presser" but the steps recited do not result in a completed film case. The apparent result of the recited steps is simply a film cover assembled to a casing, and a presser assembled to a lid; the two subassemblies are never subsequently combined. Since

Art Unit: 3726

the body of the claim does not result in the article intended to be formed as recited in the preamble, it is indefinite what applicant is attempting to claim as the invention.

Allowable Subject Matter

Claim 20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art fails to teach or fairly suggest a method of manufacturing a film case having the specific structure recited, wherein a film cover is supplied to the main assembling line and assembled with a casing, a presser is supplied to a main assembling line and assembled with a lid, and the two subassemblies are subsequently assembled together on the main assembling line to form the completed film case.
